### DETAILED ACTION

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 3-14, 18 and 19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 3-14 are indefinite because they recite "Triton X-100", which is a tradename/trademark, thus, it does not differentiate any specific material. Therefore, the scope of claims which include a trademark/tradename cannot be ascertained. Claims 18 and 19 are indefinite because they recite a "use" of the membrane, but do not set forth any specific steps to be followed. Thus, those two claims are improper method of "use" claims.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-14, 18 and 19 are, rejected under 35 U.S.C. 102(b) as being clearly anticipated by the disclosure of Jensvold et al. (5,163,977), wherein a polysulfone membrane has a coating of a non-ionic surfactant, such as Triton X-100 coated thereon.

Art Unit: 1724

5. Claims 15-17 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by the membrane making process of Herczeg (2003/0140790), wherein a hollow fiber membrane is constructed which includes a coating of PVA (polyvinyl alcohol) thereon.
6. The remaining references listed on the PTO-892 and those cited on the PTO-1449, show art of interest.
